SUMMARY

Final-year Data Science student interested in Data Engineering, with hands-on experience building ETL/ELT and real-time data pipelines. Skilled in Python, SQL, Spark, Airflow, ODI, and databases such as Oracle, MySQL, MongoDB, and MSSQL.

Soft Skills: Teamwork, problem-solving, time management, self-learning, and analytical thinking.

EDUCATION

VNUHCM – University of Science

Bachelor of Science in Data Science | GPA: 3.50/4.0

Ho Chi Minh City, Vietnam

2022 – 2026

Notable Subjects: Database Management Systems, Data Processing, Data Mining, Data Visualization, Statistics

TECHNICAL SKILLS

Programming: Python, SQL, C++, R

Data Engineering: Apache Spark, ODI, Airflow

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Data Visualization

Databases: PostgreSQL, MySQL, Oracle, MongoDB

Tools: Docker, Git, Linux

Skills: AI Agent, Machine Learning, Selenium

WORK EXPERIENCE

Saigon Thuong Tin Commercial Joint Stock Bank (Sacombank)

Ho Chi Minh City, Vietnam

Database Administrator (DBA) Intern

Jan 2026 – Apr 2026

- Engineered and optimized high-performance ELT pipelines to migrate **1,000,000+ records** daily across Oracle-to-Oracle environments using **Oracle Data Integrator (ODI)**.
- Optimized recurring **SQL** workloads by analyzing execution plans, improving joins and filters, and applying indexing/partition-aware query strategies to reduce pipeline bottlenecks.
- Leveraged **Check Knowledge Modules (CKM)** to implement data quality firewalls, automatically detecting and filtering **2% anomalous data** to ensure warehouse integrity.

PROJECTS

Real-Time CDC Data Pipeline

Feb 2026 – Mar 2026

- Built a **CDC pipeline** to sync data changes from **MySQL** to **MongoDB** in near real time using **Debezium**, **Kafka**, and **Spark Structured Streaming**.
- Used **30GB of GitHub Archive data** as the source dataset for ingestion, streaming, and synchronization testing.
- Ran **MySQL, Spark, Kafka, and MongoDB** on **Docker** for local development and testing.
- Automated CDC** setup with **Python**, including MySQL schema initialization, data loading, Kafka topic creation, Debezium connector registration, and Spark job execution.
- Handled **create, update, delete, and snapshot** events with MongoDB upserts, checkpoints, retry logic, structured logs, and dead-letter queue support.
- Tech:** Python, Spark Structured Streaming, Kafka, Debezium, MySQL, MongoDB, Docker
- GitHub:** [Real-Time CDC Pipeline](#)

Cinema Data Platform

Oct 2025

- Crawled movie schedules, showtimes, cinema locations, and ticket-price data from CGV public website using **Selenium**.
- Orchestrated an **Airflow + Spark** ETL pipeline to clean raw crawl outputs, normalize movie/cinema/session fields, deduplicate records, and validate dates/prices.
- Stored raw, staging, and curated datasets in **MSSQL**, processing **15,000+ daily records** from 80+ cinemas for downstream analytics.
- Developed a **Streamlit** dashboard for ticket price analysis, surfacing insights in weekly reports.
- GitHub:** [Cinema Data Platform](#)
